We hope you'll enjoy your stay and find all information you need. If you have any questions or suggestions for our review and guides, please let us know.Q: Advantages of multiple endpoint(s) (vs one) for a single rest endpoint in a WebApi2 project In a REST API, it is generally best practice to have a single endpoint to handle everything. [HttpGet] [Route("/user/1")] public IHttpActionResult GetUser(int id) { // some logic return Ok(); } But how does this translate to a WebApi2 project? If one endpoint is defined in the controller, is there any benefit in having multiple? public class UserController : ApiController { [HttpGet] [Route("/user/1")] public IHttpActionResult GetUser(int id) { // some logic return Ok(); } [HttpGet] [Route("/user/2")] public IHttpActionResult GetUser(int id) {

Compare Suite Light is a multi-purpose file comparison and merge utility. It helps you easily compare two documents, folder by folder and file by file. Compare files of different types. Compare images, text and binary files, find and replace differences, highlight differences, calculate differences, etc. It's really easy to use. Try it yourself! There is no need for a tutorial. If you find yourself confronted with the same document, with different versions of the same document, or a folder containing the same file, you'll need Compare Suite Light to help you. Compare and compare the documents in an easy way. Compare documents in any format: Microsoft Word, Rich Text Format (RTF), Adobe PDF, Open Office, HTML files and more. Different files, different formats... you'll find a solution for every case. This program supports all the most popular files. Compare files of different types: RTF, PDF, HTML, Word, Excel, Powerpoint, CVS, ZIP, ARJ and more. Comparing files isn't a simple process. Compare Suite Light makes the comparison process easier and faster by supporting all of the major formats, including binary files. Compare two files at once. Compare two files with pixels. For example, let's say that you want to check that the spelling of a product has been correctly updated in the documentation. You can compare all of the files, or you can compare every single document in a folder. This is especially useful if you have a lot of documents to check, or if you have a large project. For example, you can compare all of the Word documents in a folder at once, or compare all of the images in a folder. Find and replace differences. The comparison process is so easy to use, that it's very easy to miss the subtle differences between documents. For example, you may want to find the difference between two versions of a specific document, or you may want to check a single text in two documents. With Compare Suite Light, you can easily highlight every text that has changed. Every text you highlight is considered as a changed text. This process is very easy. You can find the differences and highlight any text and any color that you want. It's simple. Efficiently compare binary files. For example, you may want to check that the image in a document has been updated or that the file in a document has been updated. Compare Suite Light does the comparison in a very efficient way. You can check every single file in a folder, or you can check every single image in a folder. It's very easy to check every single file in a folder. Preview the comparison before saving it. You can preview the comparison process before saving it, and you can check the highlights and the comparisons at any time. You'll always know exactly what happened. Preview each change individually. You can check each difference individually.

Intel Pentium 4 / 3.2 GHz, 2 GB RAM, DVD-ROM Internet connection Recommended OS: Windows XP, Windows Vista, Windows 7, Windows 8 DirectX: 8.0 and above CSS: 1.5 Movie: 2000 KB-DVD Developer: Gameloft Game Rating: Screenshots: You have to quickly reach the all-important shelter of the spaceship and start shooting your way
