## Simple Caller Id

----- Simple Caller Id is a system tray caller id applet for Windows based on .NET framework. Turns on caller ID function of the modem, and when any output occurs (a call comes in), a small log window appears showing all text, verbatim. - CALLER ID FEATURE: When any output occurs (a call comes in), a small log window appears showing all text, verbatim. - SETUP AND USAGE: - Start Simple Caller Id, from tray menu click Start New Task and select your modem type. - To set your modem with Simple Caller Id you can use default settings for some modems, but for others you need to specify one of the following options: 1. "TTY50" for analog telephone line (AAL5) modem 2. "TTY51" for ISDN modem 3. "TCMS0" for telephone line (AAL1) modem 4. "TCMS1" for ISDN modem 5. "RDMS1" for POTS modem - To obtain supported modems you can use the following: - Qcode Downloader for Windows: - Modem Telephone Directory for Windows (not needed for some modems): Modems with Qcode Downloader are automatically detected with Modem Telephone Directory, and they are marked with icons. For Modems without Qcode Downloader you need to install Modem Telephone Directory separately. - Use the Task Manager to set your modem. The status of the modem is checked every 5 minutes. - If you use Modem Telephone Directory then in case of switching modems (changing the adapter) it's needed to restart the Modem Telephone Directory. - Once the modem is set then the input from the modem is recorded in logfile, and notifies are sent in case of input from the modem. - You may set the length of time to delay the logs. - You may set the interval of time to check if any log occurs in Simple Caller Id applet. - In the Preferences dialog you can specify all available settings: - "Name" for the name shown in the tray menu. - "Description" for the description. - "Actions" for the actions shown in the tray menu. - "Language" for the language of the settings and messages.

## What's New in the Simple Caller Id?
