Word To HTML Converter Crack Full Version [Win/Mac] (Latest)

Word to HTML converter is a small Windows application whose purpose is to help you convert Microsoft Word documents to HTML file format on the breeze. Simple looks and supported file formats You are welcomed by a clean feature lineup that embeds only a few dedicated parameters that you can play with. The tool lets you add documents in the working environment using the built-in browse function, so you cannot rely on the drag-and-drop support. It works with the DOC, DOCX, and RTF file format. You cannot view detailed information about each document, as the utility displays only the file path and status. Conversion capabilities Word to HTML converter gives you the possibility to build up a list with the documents that you want to convert. There's no button integrated in the main panel for helping you trigger the conversion mode, as the application automatically processes the uploaded documents and generates HTML files. It offers support for batch processing, which means you can add multiple Microsoft Word documents and convert them at the same time. On the downside, you cannot remove items from the list and stop the conversion process. Performance Since it doesn't require much computer knowledge to set up the dedicated parameters, even less experienced users can learn to master the entire process in no time. Tests have shown that Word to HTML converter carries out a task extremely quickly and provides very good output results. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Bottom line All in all, Word to HTML converter offers a straightforward software solution for helping you make use of batch processing operations in order to convert DOC, DOCX, and RTF files to HTML file format.
